

Create fog in a jar

What is fog? Where does it come from? Well, let's find out by making some!

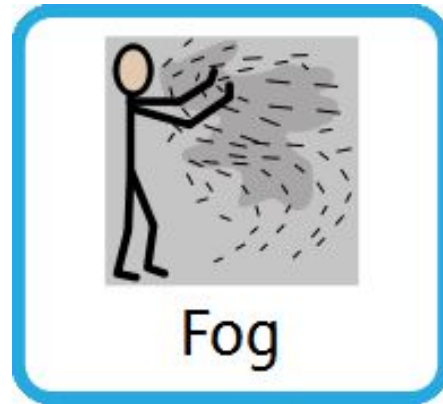

You will need:

A glass jar - you don't need the lid!

Tea strainer or small sieve

Hot water

Ice cubes

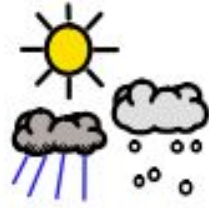

Instructions

1. Fill the jar with hot water, leave it for a minute, then drain almost all of it out.
2. Place some ice cubes in the sieve or strainer.
3. Pop the sieve or strainer on top of the jar and see what happens!
4. Did you know? Fog is a cloud at ground level.
